

# Acoustic Solid Panels / WALLS

## Truly a "Performance Finish"

STATERA Acoustic Solid Panels are made from natural sand and mineral particles that are bonded together using an environmentally friendly, precisely controlled coating process that enables specific designs and exceptional acoustic performance. The result is a high strength, fire and moisture resistant, sound absorbing material that that looks amazing.

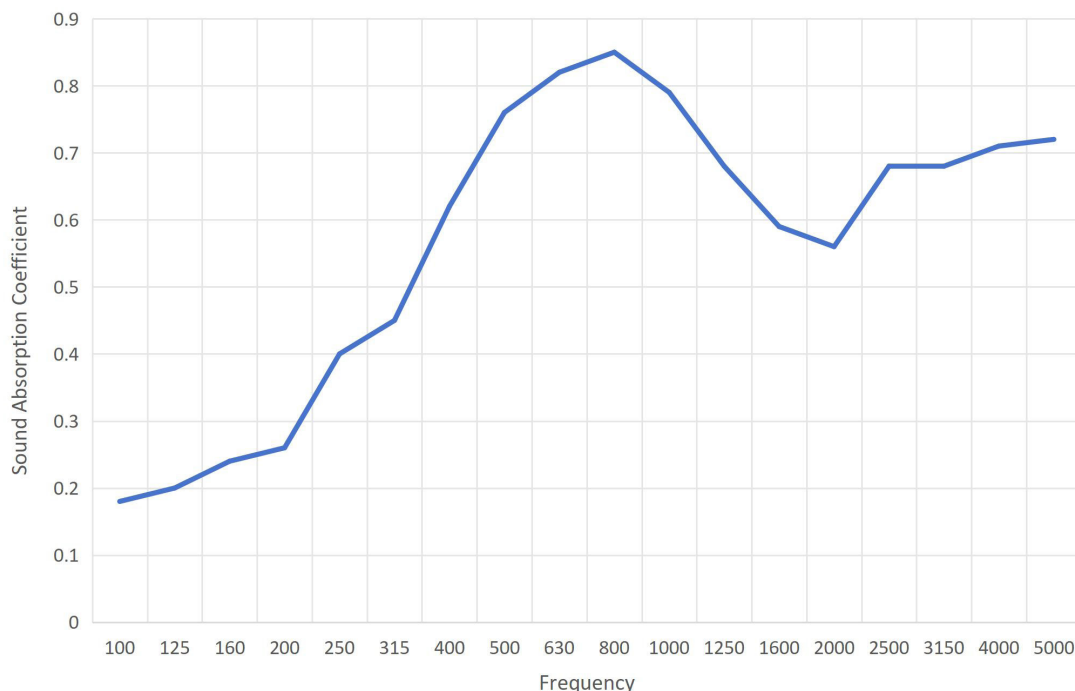

## General Specifications

Material	Natural sand and minerals
Panel Size	23.6" x 47.2"
Panel Thickness	0.31" or 0.59"
Fire Rating	ASTM E-84 Class A
Acoustic Rating	NRC = 0.70-0.90
Minimum Order	40 pcs

## Typical Acoustic Performance

Acoustic Solid Panels are a perfect way to combine the look of stone or wood with sound absorption characteristics of high-performance acoustic materials.

## Order Codes

- ST-SOLIDPANELS-8-xx (0.31" thick) >> Example ST-SOLIDPANELS-8-M4 (Marble pattern 4)
- ST-SOLIDPANELS-15-xx (0.59" thick) >> Example ST-SOLIDPANELS-15-C3 (Color 3 - Red)

## Environmental

STATERA Acoustic Solid Panels have an emission class rating = E0, the highest level, which indicates negligible formaldehyde emissions.

## Warranty

5 Year warranty on materials.
